S. R. M. Capitaneo Bellico.

Plurimam salutem.

Collegii Cracoviensis ad S. Petrum ex dono ...

Libelli hujus novâ iterum luce prodituri consilio, uti communi Juventutis utilitati: ita derivato nos inter (si tamen talis dici potest qui commune in bonum conspirat) Amori, provisum volo. Quid

me, ut hoc viri Clarissimi opusculum iterato prelo subjicerem, invitaverit! nemini ambiguum fore credo, quisquis aut usu proprio didicit, aut alieno audivit, quid sit ad manum habere in compendio: quod cæteri per tot librorum ambages sparsum vestigant, temporis cum dispendio. Quid etiam, ut tuo prodiret sub Nomine persuaserit? eædem fatebuntur pagellæ, tot Tibi titulis jam debitæ, quot Epithetis, nempe qui militari Tuâ Gloriâ, Tuiq; Gentilitii nemoris umbrâ, non Martem duntaxat muneraris, sed Apollinem quoque (olim

Addictiſsimus

Chriſtianus Iomicobus,

von Bukalgorberg.

Lector paucis te volo, siste festinan-tem oculum, & ad paucculas has notas intende.

I. Nota. Cusurus metrum, hinc ad libitum decerpes epitheta, substantiva, & verba ex ea pagella & columna, quam structura tui inchoati carminis requiret. e. g. fi[illegible] hanc heroici carminis partem.

-vv Christiadum canimus certamina Musæ.

Dactylum, quem requiris principium metri, subministrabit columna 4. paginæ 12, aut col. 1, pag. 6. aut col. 1. pag. 181.

Abdita Christiadum canimus certamina Musæ.

Moderare tamen ardorem, neque accipe obvium quodlibet epitheton, sed illud quod maximè in rem tuam facit. Epitheton, *abdita*, appositum erit, cum tractabitur de certaminibus reconditis, & non quotidianis. Quod si ten-

si tentes exprimere difficultatem illorum certaminum, accipe epithetum, *ardua* & scribe.

Ardua Christiadum canimus certamina Musa.

Similem in modum cupiens exprimere pretium illorum certaminum, sume epitheton, *aurea*

Aurea Christiadum canimus certamina Musa.

Par esto de reliquis epithetis judicium. Verbo, *canimus*, substitues alia vel eundem sensum referentia, vt *colimus*, *legimus*, *loquimur*. vel diversum juxta exigentiam cui contextus. vt *petimus*, *tremimus*, *querimur*, *sequimur*, &c. ex fol. 3. & 15.

Naufraga Christiadum querimur certamina Musa.

Quæres 1. quid faciendum. si non occurset verbum e. g. in 3a. conjugatione accommodatum meo proposito. R. substituendum aliud verbum alterius

rius conjugationis cum immutatione appellativi, *certamina*, e. g. locum verbi, *canimus*, excipiat ex fol 14. anapæstus exprimens tuum sensum vt *celebrans*. ex hoc forma tuam personam, & numerum. *celebramus*.

Ardua Christiadum celebramus ---

Ad complementum hujus metri cum vox, *certamina*, redundet vnâ syllaba, immutanda est novâ voce substituâ, quæ sit vel pæon secundus ex fol 150. aut 160. Verum cum neutro in loco quidquam ad sensum, & gravitatem materiæ præsentis inveniatur, omisso illo pæone descende ad dactylum, quem invenies fol. 117. vt *pectora*.

Ardua Christiadum celebramus pectora --

In rem quoque erunt ex eodem loco *corpus*, *crimen*, *frigus*, *germen*, *munus*, *pegma*, *robur*, *sidus*, *stemma*, *stigma*, *vellus*, *verber*, *vulnus*, &c. Quo loco velim animadvertas ad tropos, ad quos

quos invitaris vocabuli à libello tibi in memoriam revocati illectatione, quam enim hoc elegans?

Ardua Christiadum modulamur vellera.

En occasione vocis, *vellera*, evocor ad comparanda. Christianorum facinora cum Jasone, & ejus exuviis, ac gloria.

Eundem dactylum reperies in amphimacro fol. 141. vt *brachia*, *balsama*, &c. Vox *balsama* novi tropi segetem ministrat.

Quæres 2. quid faciendum, si sit mutanda persona, numerus, aut tempus verbi, e. g. loco *canimus*, scribendum sit, *canite*. Resp. quærendum verbum, quod in eo modo, tempore, numero, & persona habeat pedem à versu requisitum. In nostro exemplo est vel υυ - υ. vel -- υ. quos reperies fol 3. vt *cantitote*- vel fol. 14. v *celebrate*, vel fol. 8. vt *cantate*. Sub

sequens

ſequens ſubſtantivum ſit ex fol. 130. vel 160. vt *celeuſmata*, *pericula*, &c.

Ardua Chriſtiadū celebrate pericula --

Si occurſet prima perſona futuri, modi indicativi, numeri pluralis; ſubſtantivo, *pericula*, ſubſtitues dactylum à vocali incipientem ex fol. 117. aut 141. vt *vlcera*, *ocia*.

Ardua Chriſtiadū celebrabimus ocia --

Qua occaſione animadverte, immutari poſſe primum epitheton, *ardua*, & ejus loco ſupponi aliud magis conveniens ſubſtantivo *ocia*, aut *vlcera*.

Aurea Chriſtiadum modulabimur vlcera --

Nihil addo de immutatione ordinis, & ſimilium. plura vſus, & vox manuſque Magiſtra indicabit.

II. Nota. Ejuſdem libelli adminiculo verſum heroicum transferes in quodlibet genus metri. res pateat exemplo. Citatum verſum hexametrum vertes in aſclepiadeum ſic.

Pango

-- | -uu- | -uu | -uu-

Pango Christiadum bellica pectora. vel ex fol. 121. --- *bella* ferocia vel ex fol. 114. Insignes *animos* Christiadum cano. vel ex fol. 110.

Insignes canimus Christiadum *notas.*

Qui volet citatum sensum exprimere metro Sapphico noverit vocem *Christiadum*, sibi immutandam vel in Adjectivum *Christianus*, vel in periphrasin, *Christi sequentes labara*, &c. Si vocem *Christianus* capias, cum illa alio loco nequeat reponi, quam eo, quem tibi hæc tabella repræsentat:

-u | -- | - | uu x | -u | -u

Christiana

quære substantivum ex choreo fol. 121. vel pyrrhichio fol. 112.

-u -u-u

Bella -- | uu Christiana

uu-u-u

-v | -- | saga Christiana

Complebis versum ex fol. 229 accente monte Cyllene. Vel ex fol. 230. Tragœdo Sosycle, &c.

Bella Cyllene cane Christiana.

Periphrasi eundem sensum sic exprimes.

Pangimus Christi galeâ beatos.

Pangimus claros pharetrâ Tonantis, &c.

Horum exemplo se quisque in aliis quoque carminum generibus exercebit. Solùm hic adjungo, duplicari posse epitheta, verba, periphrasin. vt

Ardua Christiadum, Cæloque nitentia bella.

Prælegimus.

Luberet hic aliquantisper excurrere in quasdam figuras & amplificationes Poeticas, vt similitudinis, conduplicationis.

Ardua Christiadum, cedrumque merentia bella.

Bella

Bella tuis non visa plagis Mavertia Roma,
Detegimus Musæ Pindo, laurisque sacramus, &c.

Sed brevitas operis absterret, jubetque hanc spartam alii demandari operæ, aut lacerto. Ergo sit.

IIIa. Nota. Cum verbo egebis, id exquires in participiis. Vt si dactylo egeas in 1. persona indicativi modi, temporis præsentis, numeri singularis; conuoLabis ad fol. 10. col 2. vbi in 2da. conjugatione. legis verba, *calcens* &c. vel ad fol. 44. col. 2. conjug 1æ. & 45 col. 3. conjug 3., vnde formabis hæc verba, *abdico, abluo, calleo*, &c.

Quæres quid utilitatis adferat illa subdivisio in conjugatione. Resp. Multum per omnem modum. nam e. g. in secunda persona si velis dactylum, frustraberis à 1. 2. & 4. conjugatione. Neque enim *abdicas, ablaves*,

stines, *Advenis*, dactyli sunt, Ergo recurrendum est ad 3. in qua invenies quæsitum dactylum e. g. *abluis*, Similia argue de aliis numeris, personis, temporibus, modis. Nam prima persona pluralis numeri alium pedem accipit in 1. conjugatione, alium in 3. vt docent supposita verba *abdicamus*, *abluimus*.

Idem argue in nominum declinationibus, & incrementis. Nam alius est genitivus 1. & 2. declinationis, alius 3. ex eodem pede e. g. choreo. Nam 1. & 2. declinatio format spondæum. 3. verò vel choreum, vel dactylum. Qui itaque egueris dactylo in genitivo, non recurre ad 1. aut 2. declinationem, sed ad 3. ejusque vel choreum habentem incrementum breve, vt notatur fol. 7. 17. 112. 117. vel dactylum carentem incremento. ut notatur fol. 23. 25. & 135.

Ex hac nota quisque prudenter arguet tam de casibus in nominibus, quam de temporibus, modis, numeris & personis in verbis, vbi quodlibet eorum, quibus eget, inveniendum sit. Supererant præterita, & tempora ab iis dependentia, quæ ex participiis erui non poterant. Huic inopiæ & malô vt occureremus, addidimus auctarium præteritorum fol. 104.

Ex comparativis & superlativis quoque nonnulla exempla sparsim damus, vt te amice lector tædio ea ex positivis rimandi sublevaremus.

IV. Nota. Describturus opus eximium, adde opificem inventum ex annotatis inter nomina propria. vt dicturus, *Clypeus fulget*. dic. *Clypeus Didymaonis artes fulget*. nomen Didymaonis subministranse fol. 142.

Quæres quid vtilitatis afferant

no-

nomina propria hoc libello citata, Resp. non vnam ex illis capi vtilitatem. Nam 1. hinc metra adimpleri possunt eruditionibus. Vt si laudandā suscipias laurum, eam attribues monti reperto sub eo pede, quem tuum metrum postulat. vt *Lauro Cæsar coronat tempora.* dic. *Lauro Matini gloriâ Cæsar coronat tempora.* Verum nihilominus etiam est, requiri aliquam eruditionem, vt ne quis contra veritatem peccet, & laurum Rhiphæo attribuat. Quare hæc eruditio secundior est eruditis. II. Propria facem præferunt intelligendis adjectivis, & patronymicis, quæ in 3a. libelli parte à fol. 117. afferuntur. Quis enim vocem, *Pharsalicus* ex fol. 193. intelliget, & tuto absque detrimento decori & veritatis suo poemati inseret, nisi ad manum habeat tabellam referentem significationem primigenii.

Præ-

Præterea, quod ex hac nominum distributione agnosces quantitatem singulorum, neque egebis adminiculo Smetij, & similium.

Ad extremum adverte ad modum contexendi plura epitheta. dicturus eras, *Lapidosus, & piscosus Crathis*, dic. *Piscosus lapidosi Chratidis amnis*. Itemque loco, *cavæ ripæ*, dic. *curvamina ripæ*. & cum epithetis. *Longa curvamina ripæ*. *Longa curvamina conscia ripæ*.

Ex participiis præsentis temporis colligimus nonnulla substantiva in O. non invenusta. vt

Vociferans, vocifero, vociferonis.

Ex his se lectiora usurpentur nos paucula libello inspersimus. Ex his substantivis formabis adjectiva in *osus.*

vt

vt *Vociferosus*. Et ex his substantiva in *itas*. vt *vociferositas*. Quibus moderatè, & cum sale vtendum.

Alia substantiva in *etum* significantia multitudinem rerum per vocem primigeniam significatarum, habes locis nonnullis insinuata. vt ab *ancilla Ancilletum*. Quæ tamen, quia audaciam sapiunt, cautum in vtendo faciant.
